Results

Scientific and technological results of the project compared to the original objectives

- What (technological) results were obtained with the funding in comparison to the original plan?
- Were other goals achieved during the funding (events, prices, other?)
- Were all planned tasks successfully fulfilled?
- What is the current status of the product or service development?
- Was a prototype realized?
- Were objectives of the enterprise re-defined?
- Which other experiences were relevant during the implementation of the business idea?

Continuation of the commercialization plan

- Which I.P. rights were secured (patents, trademarks and utility models)?
- Were license agreements with the university, the research institutes or third parties signed? (Explain if applicable)
- Describe the product roadmap
- What is the strategy to ensure the USP?
- Was the enterprise already funded? If applicable state funding date, name, commercial register number, URL and the legal status of the enterprise

Key Factors to Economic Success

- Were the economic objectives met by the enterprise?
- Is the impact of the innovation still relevant in the current status of technology?
- Did notifications of third parties occur that could hinder the success of the company?
- Was the product tested by launching customers?
- Did the team build relations to strategic or distribution partners?
- How does the financial planning of the company look like? What are the next steps?

R&D Planning

- How does the subsequent and longterm research and development plan look like?
